K-1000/12/70.

REGISTER OF MINUTES

Latitude.....

Longitude

Time of Observation..... 9 am

Height of Receiver
of Rain Gauge

Above Ground.....1 foot.

Above Sea Level.....245.71 ft.

CONDENSED INSTRUCTIONS.—Fix the gauge firmly, with its orifice level and 1 ft. above the ground, quite clear of trees and walls, empty it daily at 9 a. m., and enter it against the preceding day. Snow should be melted slowly in a closed vessel and the amount entered as rain, an "S" being prefixed. With a low temperature and high wind it is sometimes blown out of the funnel; take then one-twelfth of the average depth of snow and enter that as the yield of water, *e.g.*, 2 inches snow=17 of rain. When there is no rain a line should be drawn, rather than cyphers inserted.

Please write any remarks on the other side.

If the gauge has been moved during the year state—

Date.

Distance.

Direction.

How was the height above sea level ascertained?

How many inches of rain will the gauge hold without overflowing?

What are the nearest objects to the gauge, and what are their heights and distances?

Objects.

Height.

Distance.

Direction.

Tower of
Town Hall

150 ft

110 ft

S. W.

What is the nearest parish church?

Name.

Distance.

Direction.

St. Martin's

350 yds.

N. W.

If you know of any records not quoted in *British Rainfall*, please mention the stations and the observers' names.

REMARKS ON THE YEAR.

Please write any remarks on the other side.

If the gauge has been moved during the year state—

Date.

Distance.

Direction.

How was the height above sea level ascertained?

How many inches of rain will the gauge hold without overflowing?

What are the nearest objects to the gauge, and what are their heights and distances?

Objects.

Height.

Distance.

Direction.

What is the nearest parish church?

Name.

Distance.

Direction.

If you know of any records not quoted in *British Rainfall*, please mention the stations and the observers' names.

REMARKS ON THE YEAR.
